e3 Robotics Innovators

OUR MISSION

Our mission is to EXCITE~EDUCATE~ENCOURAGE children and teens to explore and develop their interest in STEM related fields. We EXCITE children by introducing them to STEM in a fun, experiential, and hands on way. We EDUCATE children to the importance of advancing STEM careers as well as skill building including the ability to problem solve, think critically, troubleshoot, communicate effectively, and manage projects. We ENCOURAGE students to participate in our Leadership Development Training program which also includes entrepreneurial skills—the ability to see the “bigger picture” context of their work and to tackle problems in creative and innovative ways. In addition, students develop interpersonal skills as they work together to solve problems and overcome challenges.

e3 Robotics is a registered non-profit 501(c) 3 organization with visionary leadership to assist students, educators and industry as we forge ahead in the 21st century. Our programs are results-oriented, research and inquiry based.

TEAM PHILOSOPHY

The e3 Robotics competition is about student learning. It is designed to be an event that challenges students to apply the physics, math, electronics, and engineering skills they are learning in the classroom to solving problems from the workplace. Mentors (teachers, parents, working professionals) are expected to limit their input to educational and inspirational roles and are encouraged to focus on the benefits of the learning process and not simply on “winning” the competition.
